

# DJS Metal & Lead Roofing – Making your dreams become a reality ([djsroofingconsultancy.co.uk](http://djsroofingconsultancy.co.uk))

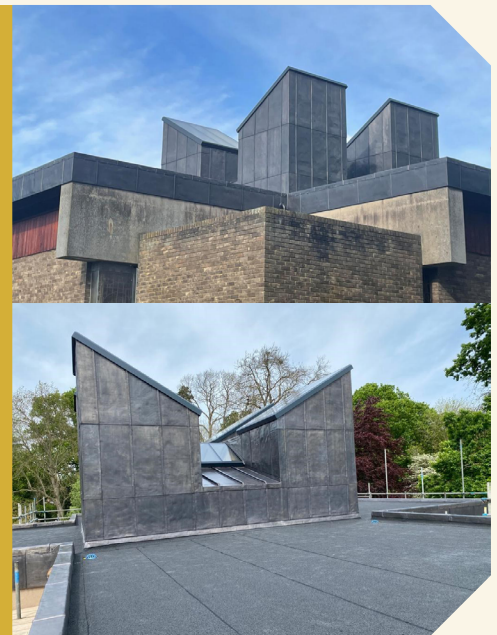

At DJS Metal & Lead Roofing Ltd we complete both main contractor and sub-contractor works to both new and historic buildings across the UK such as churches and cathedral through to new housing. With over 30 years of experience within the construction and restoration industry you can be assured that with a great level of knowledge, skill and a great deal of passion and pride in what we do your projects are in safe hands.

## Church Hill College Chapel

DJS Metal & Lead Roofing Ltd had the pleasure of being the main contractor on this beautiful 1960's chapel in Cambridge. Works that were completed were that of new timber works, insulation & Felt roof coverings, new skylights to the five openings and new milled lead works. This has then a pleasure to work on and with the finished detailing this beautiful structure will stand proud for many years to come.

With new code 5 milled lead sheeting, fascia, capping's, and flashings supplied by CEL Lead & Hard Metals and Installed by DJS Metal & Lead Roofing Ltd this has now brought the building back to life and also reduced running costs due to the insulation and products installed.

## Forest Hill Culford

This 1980's traditional building was showing signs of age with a number of leaks which had begun to deteriorate the timber roof structure. Following a thorough inspection of the roof area and structure DJS Metal & Lead Roofing Ltd was awarded to project which was to be completed in ZM Zinc Quartz with various timber repairs and warm roof 110mm insulation board installed.

Following the completion of various timber repairs, 110mm insulation boarding and the installation of new VM Zinc Quartz standing seam roof and new Quartz gutters the building can again stand proud. Installation of all works completed by DJS Metal & Lead Roofing Ltd with the supply of VM Zinc from CEL Lead & Hard Metals Ltd.
